## HOISTING WINCH

MODEL	Direct pull (kg)	Q.ty of Rope (m)	Max Hoisting speed (m/min')	Rope Diam. (mm)	Weight (Kg)
<b>SPIDER 15.70</b>	230	35	28	6	80
<b>SPIDER 20.95</b>	250	35	28	6	80
<b>SPIDER 22.10</b>	250	35	28	6	65
<b>SPIDER 27.14</b>					
<b>SPIDER 30T</b>					
<b>SPIDER 33.15/300</b>	300	35	28	6	80
<b>SPIDER 39T / 43T</b>	500	40	18	6	86

Approved according to uni-EN13.000 & winch 4301/1

The spider-type tracked platform is synonymous with equipment that must make its versatility of use one of the main reasons for development.

This concept has made it possible to create a lifting accessory that is particularly suitable for light loads as an alternative to the operator basket. The simplicity of coupling and release the aerial basket together with the remote control of the "RADIO" type allowed the Platform Basket technicians to implement a hoisting winch of extremely compact dimensions, which is fully hydraulic, controlled at a distance and with a quantity of cable wound that allows an easy use in the handling of materials on roofs, floors of buildings and in any situation at a height.

The device is composed of a pre-assembled winch kit with all the safety devices in conformity with the regulations in force (UNI-EN13000), that through a simple coupling pin allows the platform to recognise the device and therefore allow its safe use.

By means of a wheeled truck, a single operator, after removing the platform basket supplied, simply approaching the truck allows the quick coupling and by means of an electric connector and a pair of quick couplings, the connection to the platform.

The radio-type remote control will allow the operator a total visibility in handling, which is equivalent to a lifting crane.

Finally, for charterers it will also be possible to have platforms designed to receive the winch and to buy the kit separately so that it can be exchanged from one platform to another as required.

Trolley designed for quick winch installation & removal.
